

Release Ref: SpiroCross promotion

Release Date: June 2018

## **Spirotech extends SpiroCross cashback offer**

Due to high levels of demand, Spirotech, the UK's premier supplier of water treatment solutions, has extended its cashback offer on its market leading SpiroCross range for an additional three-month period.

The offer, which initially launched on 1<sup>st</sup> November 2017, has been extended until 31<sup>st</sup> July 2018, with heating engineers and contractors able to claim a minimum of £70 cashback when they purchase a unit from the SpiroCross AX brass range, including the AX100, AX125 and AX150.

The SpiroCross is a multi-functionality 3-in-1 product combining deaeration, dirt separation and hydraulic balancing in one single unit, delivering cost savings across purchasing, installation and maintenance in new build and refurbished heating, cooling and process systems.

Kevan Peaker, UK Business Director at Spirotech, said: "Demand for the cashback promotion has been high since its launch back in November, so we wanted to continue the momentum, by extending the offer.

"As it stands, the SpiroCross is the only product available with the ability to deliver hydraulic balancing, dirt separation and deaeration in one unit, all of which are key in achieving optimum system performance. The SpiroCross' compact size, robustness and long warranty are already popular and the cashback offer is adding to its appeal."

The SpiroCross AX, made from high quality brass, is suited to both domestic and light commercial applications. Connection sizes range from 1" to 1.5", with all units boasting a 20-year warranty and weighing just 6.5 kg.

In order to make a claim, customers are asked to simply send an email with their purchase invoice or VAT receipt to [office\\_uk@spirotech.co.uk](mailto:office_uk@spirotech.co.uk).

For further information on the SpiroCross or other products in Spirotech's range of dirt, air, pressurisation and chemical solutions for domestic and commercial applications, visit [www.spirotech.co.uk](http://www.spirotech.co.uk).
