

SPIROPLUS® AND SPIROTRAP MB2® A winning combination.

The NEW SpiroPlus range from Spirotech work seamlessly with acclaimed dirt separator, the SpiroTrap MB2 to achieve improved system performance and energy efficiency.

SPIROPLUS® Flushing Agents & Additives

SpiroPlus Protector Corrosion protector & inhibitor

SpiroPlus Sealer Leak sealer

SpiroPlus Mild Cleaner Dirt dissolver (flushing agent, pH-neutral)

SpiroPlus Power Cleaner Dirt dissolver (flushing agent)

SpiroPlus Lime Cleaner Descaler (flushing agent)

SpiroPlus AntiFreeze Frost protector

SPIROTRAP® MB2 Domestic Heating System Dirt Remover

The SpiroTrap MB2 is ideal for installation on pipe work at any angle. Simply adjust the angle of the unit by using its unique 'twist-release' ring nut, cut the pipe and install. It's that simple!

Product overview SpiroPlus		
	Quantity	Art. nr.
SpiroPlus Mild Cleaner Dirt dissolver (flushing agent, pH-neutral)	1 litre	CD001
SpiroPlus Mild Cleaner Dirt dissolver (flushing agent, pH-neutral)	2,5 litre	CD0025
SpiroPlus Mild Cleaner Dirt dissolver (flushing agent, pH-neutral)	10 litre	CD010
SpiroPlus Power Cleaner Dirt dissolver (flushing agent)	1 litre	CC001
SpiroPlus Power Cleaner Dirt dissolver (flushing agent)	10 litre	CC010
SpiroPlus Power Cleaner Dirt dissolver (flushing agent)	200 litre	CC200
SpiroPlus Lime Cleaner Descaler (flushing agent)	1 litre	CL001
SpiroPlus Lime Cleaner Descaler (flushing agent)	2,5 litre	CL0025
SpiroPlus Lime Cleaner Descaler (flushing agent)	10 litre	CL010
SpiroPlus Lime Cleaner Descaler (flushing agent)	60 litre	CL060
SpiroPlus Sealer Leak sealer	1 litre	CS001
SpiroPlus Sealer Leak sealer	2,5 litre	CS0025
SpiroPlus Sealer Leak sealer	10 litre	CS010
SpiroPlus Protector Corrosion protector & inhibitor	1 litre	CH001
SpiroPlus Protector Corrosion protector & inhibitor	2,5 litre	CH0025
SpiroPlus Protector Corrosion protector & inhibitor	10 litre	CH010
SpiroPlus AntiFreeze Frost protector	2,5 litre	CA0025
SpiroPlus AntiFreeze Frost protector	10 litre	CA010
SpiroPlus AntiFreeze Frost protector	60 litre	CA060
SpiroPlus AntiFreeze Frost protector	200 litre	CA200

Always refer to the manufacturer's instructions before use.

Custom made

For specific application we also develop custom made additives. Our specialists can give you the best advice for every situation.

Measuring instruments & test kits

For continuous optimal system protection Spirotech also provides a number of measuring instruments and test kits.

SPIROPLUS® & SPIROTRAP MB2®

THE WINNING TEAM FOR OPTIMUM SYSTEM PERFORMANCE

SPIROPLUS® FLUSHING AGENTS AND ADDITIVES FOR HEATING, COOLING AND PROCESS SYSTEMS

PROTECTOR

SpiroPlus Protector is ideal for the protection of boilers, radiators and heat exchangers. It acts as an inhibitor and prevents limescale deposits and corrosion of all commonly used metals in a system, such as stainless steel, copper and aluminium. Mixing ratio 1: 100

MILD CLEANER

Dirt occurs in every system and this can lead to annoying and costly consequences. SpiroPlus Mild Cleaner removes dirt particles and depositions from radiators, pipes and heat exchangers. Mixing ratio 1:100

LIME CLEANER

Pipe water always contains calcium. This results in limescale in pipes & system components. SpiroPlus Lime Cleaner is an effective agent to remove limescale. Central heating boilers & systems (Mixing ratio 1:10). Boilers; direct & indirect fired (Mixing ratio 1:1)

SEALER

Small leaks will occur in any system, however well that system has been designed. SpiroPlus Sealer is absorbed into the intermolecular spaces within the system and forms an internal protective layer wherever incoming oxygen is present. Mixing ratio 1:2

POWER CLEANER

Contaminations have a negative influence on system performance. SpiroPlus Power Cleaner is a powerful flushing agent that dissolves and removes persistent contaminations and deposits. Mixing ratio 1:10

ANTIFREEZE

Most systems do not need to be in constant operation during the winter period, but pipes and devices should not be damaged from freezing. SpiroPlus AntiFreeze is the solution to be used for this. Mixing ratio 50:100 offers protection down to -28°C
